

Harshavardhan Gudem

Salt Lake City | +13854617240 | harsha.gudem2@gmail.com | [LinkedIn](#)

Summary

Experienced **Software Engineer** with over **4 years** of hands-on experience designing and developing scalable, responsive web applications. Proficient in Java **Spring Boot**, **ReactJS**, **TypeScript** with a strong foundation in both front-end and back-end development. Skilled in building RESTful APIs, managing SQL/Oracle databases, and deploying secure, cloud-native solutions using **AWS** and **Kubernetes**. Adept at translating complex business requirements into intuitive user experiences using modern UI/UX design practices. Passionate about delivering high-performance applications that drive user engagement and business growth. Proven success in Agile environments across healthcare and e-commerce domains.

Work Experience

Monument Solar

Salt Lake City, Utah, USA - Remote

Software Engineer

Jan 2024 – Present

- Contributed to the development of a comprehensive full-stack Java application connecting travelers with landowners for RV parking, with responsibilities spanning both front-end and back-end development.
- Led the **backend development using Java Spring Boot**, focusing on scalable architecture, efficient API design, and integration with Oracle databases to ensure robust data handling.
- Implemented advanced front-end features using **React** and **TypeScript**, including dynamic listing views with pagination, interactive maps, and responsive UIs, enhancing user engagement and satisfaction.
- Designed and optimized **RESTful APIs** and executed complex queries with **SQL database**, supporting high-volume transactions and ensuring application performance.
- Configured and maintained **SQL** schemas, optimizing data access through efficient query execution and indexing strategies.
- Leveraged **AWS cloud services** such as **S3 for media storage** and **EC2 for deployment**, and integrated **Kubernetes** for container orchestration, enabling scalable, fault-tolerant deployment pipelines.
- Implemented secure user authentication and session management using **OAuth2** and **JWT**, strengthening data protection and compliance with security standards.
- Streamlined booking workflows by developing a robust property and booking management system, reducing drop-off rates by 30% and improving property administration efficiency.
- Coordinated extensive testing phases using Postman and implemented a CI/CD pipeline for efficient deployment, ensuring the application met all functional and security standards before launch.
- Actively participated in Agile development cycles and utilized Confluence for technical documentation, accelerating feature delivery by 25% and improving cross-team collaboration.

University of Utah

Salt Lake City, Utah, USA

Developer intern

Aug 2023 - Aug 2024

- Developed dynamic user interfaces for patient portals and administrative dashboards using **ReactJS**, **Redux**, and **Tailwind CSS**, enhancing usability for 80,000+ healthcare users and increasing user satisfaction by 20%.
- Translated **wireframes** and mockups into high-quality interactive web pages while adhering to modern UI/UX standards, improving accessibility compliance by 25%.
- Tested and debugged UI** components for cross-browser compatibility and responsiveness, achieving 99.9% uptime and enabling uninterrupted healthcare workflows.
- Actively contributed to **Agile development cycles**, delivering iterative updates and enhancements aligned with project goals, ensuring timely feature releases.

Total Infra & Mining Solutions

Hyderabad, India

Software Engineer

Nov 2021 - Jul 2023

- Engineered scalable backend services for an internal procurement management system using **Java**, **Spring Boot**, and **Hibernate**, enhancing transaction throughput and improving backend processing performance by 20%.
- Designed and developed robust **RESTful APIs** for procurement workflows, vendor management, and approval systems, achieving a 30% reduction in response times through efficient service-layer optimizations.
- Modeled and optimized complex database schemas in **Oracle Database**, leveraging PL/SQL for stored procedures and triggers to handle business-critical logic and ensuring high-performance data operations.
- Secured APIs and backend systems using **Spring Security** with **OAuth 2.0** and **Role-Based Access Control (RBAC)**, ensuring compliance with enterprise-grade access control requirements.
- Containerized backend services using **Docker** to create consistent development, staging, and production environments,

and implemented environment-specific configurations for Oracle integration.

- Streamlined CI/CD pipelines using **Jenkins**, integrated with **Maven**, **Docker**, and **Kubernetes**, reducing manual intervention and increasing deployment reliability by **50%**.
- Deployed services on **AWS EC2** and managed static assets with **S3**, supporting a reliable and scalable cloud infrastructure.
- Collaborated with cross-functional teams using **Agile** methodologies, participating in sprint planning, code reviews, and backend performance audits to drive continuous improvement and scalability.

South Central Railway,

Information Technology Intern

India

Jun 2020 - Jan 2021

- Developed and maintained responsive front-end user interfaces for a **mobile railway ticketing system** using HTML, CSS, and modern JavaScript concepts, improving system responsiveness and user satisfaction by **35%**.
- Provided frontline **support and technical troubleshooting** for UI navigation and **performance optimizations**, resolving issues efficiently and enhancing team collaboration.

Technical Skills

Programming: Java, PHP, JavaScript, Python

Databases & Data Processing: MySQL, Oracle, NoSQL, MongoDB, Redis, Apache Kafka, GraphQL, JPA, Hibernate

Web Development: HTML, CSS, Bootstrap, JavaScript, React, Angular, Restful API Design and Integration, Microservices

Tools & Platforms: Spring Boot, GitHub, Visual Studio, Babel, Webpack, Azure SQL Database, Docker, Microservices, Kubernetes, Linux Shell, Scripting, Eclipse IDE, Jenkins, Jira, Postman

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, System Design, Problem-Solving

Cloud Infrastructure: AWS, EC2, S3, Elastic Load Balancing, ECS

Testing: Selenium, Cypress, Postman, JIRA, GitHub Actions, Playwright, Unit Testing, Component Testing, Integration Testing

Education

University of Utah, David Eccles School of Business

Salt Lake City, UT

Master of Science in Information Systems

Aug 2023 - Aug 2024

Jawaharlal Nehru Technological University Hyderabad, CMR Technical Campus

Hyderabad, India

Bachelor in Mechanical Engineering

Jun 2017 - Jul 2021

Projects

Supergear

- Developed a full-featured **E-commerce platform** with dynamic product and category pages, a product list page, and promotional banners using React with **Vite.js** for the Front-End and **Node.js** for the Back-End.
- Integrated **Firebase** for secure authentication, media storage, and real-time database management, enabling efficient handling of user data and transactions.
- Implemented **Stripe.js** for seamless and secure payment processing, enhancing the checkout process for users.
- Utilized Tailwind CSS for responsive design and styling, creating an engaging and visually appealing user interface, and added a blog section to support content marketing and **SEO** initiatives.

Biomat USA

- Developed a **plasma donation web application** using HTML, CSS, JavaScript, **PHP**, and SQL, streamlining the donation process and improving usability.
- Designed a visually appealing and user-friendly interface using HTML and CSS, ensuring intuitive navigation and accessibility.
- Implemented key functionalities such as **authentication, authorization, session management, and secure password encryption with hashing algorithms using JavaScript and PHP**.
- Utilized SQL for robust **database management**, enabling efficient storage and retrieval of user and donation data.
